1 Introduction

This module allows you to hide payment methods when a certain carrier is selected. You can use this to charge an additional fee when the custom for example chooses cash on delivery. On the configuration page "Modules and Services > Payment" you will see a new section where you can configure the restrictions (Carrier restrictions).

1.1 Quick Start

During the installation, the module has done most of the work for you. If there are no error messages in the troubleshooting section on the configuration page of the module, it means that this module has been successfully installed and is working properly. Otherwise, follow the messages' advice or correct all errors by simply clicking 'Attempt to fix it all'.

Check if the following settings are correct:

1. The module has been hooked onto:
 - `actionObjectCarrierDeleteBefore`
 - The carriers have been configured on the page "Modules and Services > Payment".
2. You are good to go! Should you find any problems, please contact us through PrestaShop Addons.

2 Installation

This module can be installed in the usual way. By uploading a zip-file to the modules page in the PrestaShop back office, it will be extracted and installed automatically. More information about installing modules can be found in the official PrestaShop documentation: <http://doc.prestashop.com/display/PS16/Modules+and+Themes+Catalog#ModulesandThemesCatalog-Installingamodule>. If you have successfully managed to install the module you can proceed to section 3.

Country	Bank wire	Cash on delivery (COD)	Payment by check
Albania	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Algeria	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
American Samoa	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Andorra	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Angola	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
...	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Save restrictions

CARRIER RESTRICTIONS

Please mark each checkbox for the carrier for which you want the payment module(s) to be available.

Carrier restrictions	Bank wire	Cash on delivery (COD)	Payment by check
My super carrier	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Cash on delivery	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3 Configuration

This section is about the configuration step right after you have installed the module. The module has been transplanted onto the necessary hooks, the overrides have been successfully installed and the module is enabled for every store. Optionally, you can disable the module on the page "Modules and Services > Modules and Services" in order to disable the module for a particular store when using multistore mode.

By visiting the page "Modules and Services > Payment", you can configure the payment method-carriers restrictions in a new section called " Carrier restrictions".

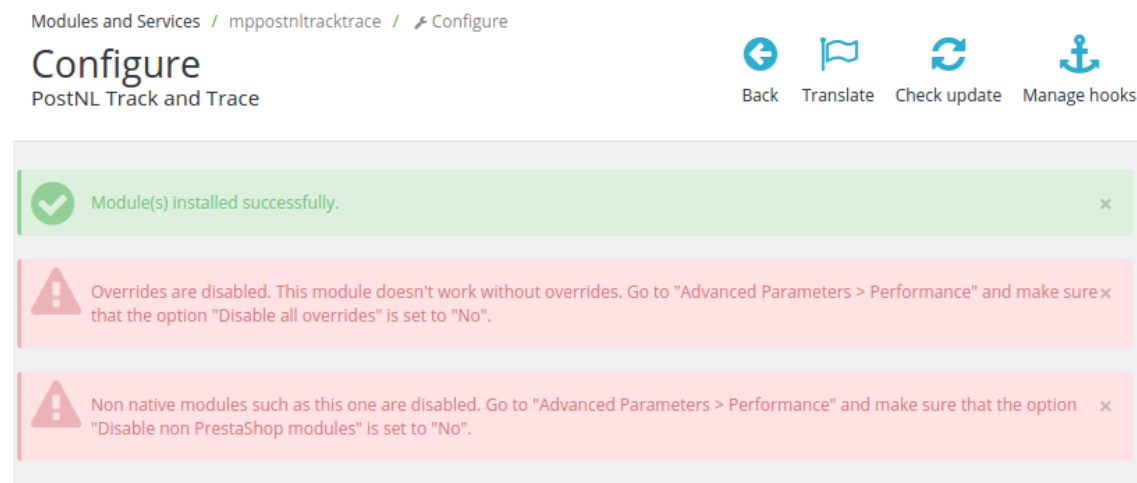

Figure 2: Wrong settings

4 Troubleshooting

During the installation, PrestaShop installs the necessary overrides and other files if your PrestaShop version is below 1.6.1.1. Newer versions do not require an override. Sometimes PrestaShop might fail to install modules correctly, due to an incorrectly installed override. Most of the time, those problems are caused by incorrect file permissions. It is also possible that the overrides are already in use by another module. It is not possible to share overrides between modules, so in that case you will have to upgrade to at least 1.6.1.1 in order to use both modules at the same time.

4.1 Overrides or non-native modules have been disabled

The module checks whether your PrestaShop settings are correct. In case it finds wrong settings you will see error messages such as in figure 2. Follow the instructions. You can consult PrestaShop's official documentation for more information:
<http://doc.prestashop.com/display/PS16/Performance+Parameters#PerformanceParameters-Debugmode>.

4.2 Module not hooked or not enabled

The easiest and recommend way to fix this is by clicking **Attempt to fix it all** on the module's configuration page.

4.3 Contact us

If you're still having trouble with configuring or installing the module, don't hesitate to contact us through PrestaShop Addons. We're here to help!

5 Demo environment

5.1 PrestaShop 1.6

<https://cookiesync1.mijnpresta.nl> is the frontend demo of the first store.

The back office of the first store is available at <https://mppaymentstocarriersdemo.mijnpresta.nl/admin1234>
